FlyRight introduces King Air 300/350 Training Training Center Receives Insurance approval for King Air 300/350 recurrent training

FlyRight Inc. has introduced King Air 300 and 350 recurrent training to its course offerings. Approved by all major insurance providers, FlyRight now offers approved training for the entire King Air product line.

An intensive 2 ½ day course, FlyRight's 300/350 Recurrent Training program is priced less than any other program that uses a full-motion King Air simulator. The program builds on FlyRight's B200 training – utilizing the Company's Level-C King Air B200 simulator and incorporating classroom material focused on practical 300/350 differences. Like FlyRight's other King Air courses – company instructors are always experienced King Air pilots with significant operating experience in the aircraft they teach.

FlyRight's 300/350 Recurrent Training program is the direct result of feedback FlyRight received from existing and prospective customers. Tom Leahy, FlyRight's VP of Training, commented "Offering 300/350 training was a natural progression. This course extends FlyRight's reach to cover the entire King Air product line. Our professional instructors have significant piloting experience in the full range of King Air products, and it seemed natural that we offer 300/350 operators the same great training we've delivered to our King Air 200 and 90 customers".

Pilots completing FlyRight's 300/350 Recurrent Training course receive FAA sign-offs for 61.56 Flight Review, 61.57 (d) Instrument Proficiency Check (if requested), and also satisfy night landing and instrument recency requirements.

About FlyRight

FlyRight is an FAA-approved 142 Training Center. Founded in 2003, FlyRight provides professional, simulator-based flight training to FAA part 91 and certificated operators. With a focus on quality and safety, its management team has over 30 years of corporate and commercial training experience. Based at the Concord Regional Airport, FlyRight's 10,000 square foot training center is conveniently located in the heart of one of the fastest growing areas in the United States. Centrally located on the east coast, FlyRight is just 20 minutes from Charlotte-Douglas Airport (the 10th busiest airport in the country, served by AirTran, American Airlines, Continental Airlines, Delta, JetBlue, Midwest Airlines, Northwest Airlines, United Airlines, and USAir).
